

LIPOSUCTION

IN 10 STEPS

VS

COOLSCULPTING

IN 10 STEPS

1

Put under local or general anesthesia

2

Surgeon makes incisions and aggressively sucks out fat via a cannula and vacuum pump

3

Incisions are closed.

4

Constricting bandages and compression garments must be worn

5

Someone must pick you up.

6

Swelling and bruising for the first 5 days

7

Soreness for the first 2 weeks.

8

Up to 9 months for skin to completely contract..

9

Uneven fat removal, dimpling and waviness, infection, seroma and embolism can occur.

10

Your bank account is \$4,000+ lower

1

A numbing gel is applied

2

Read a book or take a nap.

3

Dr. Behroozan uses CoolSculpting device to freeze fat cells.

4

Skin and healthy tissue remains undamaged.

5

Frozen fat cells die.

6

An hour later, you can go home

7

Resume all normal activity.

8

Watch your fat disappear as your body disposes of dead fat cells in the next few months.

9

No side effects.

~~SIDE EFFECTS~~

10

Use the money you save for a new outfit!
